FEMA

PER 404: Logistics and Supply Chain Resilience in Disasters

Course Overview: The goal of this certified DHS/ FEMA performance level course is to train public and private stakeholders to establish a resilient disaster supply chain that is capable of rapidly sourcing, tracking, transporting, staging, and distributing critical emergency supplies to survivors during a disaster. The training provides a practical approach for participants to develop rapidly collaborative public and private solutions to restore pre-existing supply chains that provide critical supplies to survivors during a disaster. The course includes a series of disaster simulations with participants racing against time to keep supplies moving while confronting challenges common to disasters.

Target Audience: Public and private sector disaster logistics and supply chain stakeholders, including Federal, State, Local, Tribal, and Territorial leadership and management, Councils of Government and Area Development Districts, Emergency Management Personnel and Responders, Agriculture producers, Non-profits, and Economic Development Agencies.

Delivery: PER 404 can be delivered as a virtual instructor-led course (4-days at 4 hours per day) using Zoom video conferencing technology or as an in-person instructor-led course (2-days at 8 hours per day).

Course Length 16-hours/1.6 CEUs

Participant Numbers: Minimum 21 participants. Maximum 60 participants (virtual delivery). Maximum 45 participants (in person delivery).

TRAINING MODULES

Module 1: Overview and Administration

Module 2: Cross-Sector Coordination

Module 3: Planning

Module 4: Response

Module 5: Practical Exercise

Module 6: Course Evaluation and Administration
